Enterprise Container and Data Management

Portworx by Pure Storage delivers unified storage management, optimized storage performance, and enterprise-grade business continuity for SUSE Cloud Native landscapes. Portworx streamlines container data operations with automated capacity and optimization management, protects container data with high availability and zero RPO disaster recovery, and supports hybrid- and multi-cloud environments. Portworx also enables self-service access to simplify Day 2 operations and accelerate developer productivity. When combined with SUSE Rancher Prime, enterprises unlock the value of Kubernetes at Scale.

Optimized performance for containerized apps at scale

SUSE Rancher Prime and Portworx empower organizations to efficiently deploy and manage high density, high performance, containerized workloads at scale with automated capacity and performance management with a minimal storage footprint.

Enterprise-grade availability and business continuity

Portworx delivers highly available, persistent storage for containerized workloads and flexible disaster recovery policies that help ensure zero data loss in case of failure. SUSE Rancher Prime minimizes downtime risk with trusted delivery and policy-driven security and compliance features. Enterprises can further minimize downtime with SUSE Security for full lifecycle, real-time container security.

Efficient operations

SUSE Rancher Prime and Portworx help enterprises unify operations, even across hybrid- and multi-cloud Kubernetes landscapes. With comprehensive tooling and automation, streamlined operations, observability, and intuitive interfaces, enterprises can quickly realize operational efficiencies.

Accelerated developer productivity

Portworx and SUSE Rancher Prime enable streamlined Kubernetes cluster provisioning and self-service storage access, reducing wait times for development teams and driving productivity by giving developers more time to do what they do best — developing applications.

Why SUSE Rancher Prime and Portworx?

Unlock the value of Kubernetes at enterprise scale

Enterprise Container Management

SUSE Rancher Prime

Streamlined Kubernetes management
Simple, consistent hybrid- and multi-cluster Kubernetes management with comprehensive features and intuitive UI

Trusted and secure
Centralized security, policy, and user management, secure supply chain, and trusted delivery

Enterprise lifecycle and support
Consistent releases cycles, enterprise lifecycle management, priority support and services

Freedom to choose
Support for any CNCF Kubernetes distribution, on premises, in the cloud, and at the Edge

Enterprise Container Data Management

portworx by Pure Storage

High Performance Storage
Minimal resource consumption and automated capacity management

Enterprise-grade business continuity
High availability and asynchronous and synchronous disaster recovery

Self-service access for developers
Reduce developer wait time and streamline Day 2 operations

Unified Storage Anywhere
Centralized storage management no matter where they're located

SUSE is a global leader in innovative, reliable, secure enterprise-grade open source solutions, relied upon by more than 60% of the Fortune 500 to power mission-critical workloads. We specialize in business-critical Linux, enterprise container management and edge solutions, and collaborate with partners and communities to empower our customers to innovate everywhere – from the data center, to the cloud, to the edge and beyond. SUSE gives customers the agility to tackle innovation challenges today and the freedom to evolve their strategy and solutions tomorrow.

Portworx by Pure Storage provides a fully integrated container data management platform to automate, protect and unify modern applications across hybrid and multi-cloud enterprise deployments. Portworx accelerates time to revenue, delivers data resiliency, and agility at enterprise scale without any compromises.
